

Thinking

We had to use

Recall of the last time we did PrEP. Memory
 Problem solving skills.
 Imagination.
 Mathematical thinking. Maths knowledge. Money,
 Statistics, Measurement
 Planning We had to plan our business:
 People, product, skills, time, materials, pricing
 We had to think about co operation and communica-
 tion.

Good Points

The good things about PrEP are

We worked really hard.
 You get to spend the money you earn.
 It's fun.
 It's hard work but rewarding.
 People have different ideas and skills.
 On market day most adults had the correct money so
 we didn't have to give change.

Feelings

We felt:

Happy
 Confused
 Embarrassed
 Jealous / envious
 Proud
 Excited
 Stressed/worried
 Sad
 Emotional

Bad Points

The things that needed to be im- proved were

More time to learn about money and businesses be-
 fore becoming a business.
 People's concentration and time management.
 People's commitment to their business.
 Some people's cooperation skills.
 Better choices

Facts

We learnt how to :

give change.
 bank our money.
 talk about money.
 improve our food preparation skills.
 sort the value of prizes.
 be patient and co-operative.
 how to gather information.
 work for your money, and that sometimes you work
 hard but you still don't earn much money.

New Ideas

Next time:

Think carefully about how to set up our business for
 market day.
 We should think of more possibilities before we de-
 cide.
 Locate stall closer to the main area.
 Have a roster for having time away from the stall.
 Pre order so we don't waste time collecting or making
 products that we can't sell.
 Better paper work.

Know how to make or do whatever we plan to sell
